Loosen material solidified in bulk bags with BLOCK-BUSTER® Bulk Bag Conditioners

BLOCK-BUSTER® Bulk Bag Conditioners press bulk bags on opposite sides with hydraulically-driven conditioning plates to crush and loosen bulk mining materials that have solidified during storage and shipment.

Bulk bags can be raised, lowered, and rotated for complete conditioning of the bag on all sides at all heights, using automated turntables and scissor lifts, or electric hoist and trolley assemblies.

Materials typically loosened by BLOCK-BUSTER Bulk Bag Conditioners include ammonium nitrate, lime, thiourea and other products that solidify in bulk bags.
